

Please amend the paragraph starting at page 13, line 4, with the following:

* 3 --Once a user is satisfied with a page layout, an upload command is selected and the finished page layout is uploaded to a server (remote computer 109 in FIGURE 1). The source files associated with each template is mapped to the templates at the server. FIGURE 2 shows the resulting page layout 220 for the exemplary arrangement of style templates 201 and associated source files 210.--

IN THE FIGURES

See attached Letter with Proposed Drawing Changes and Formal Drawings.

IN THE CLAIMS:

A-4 Sub 11. (Amended) The method according to claim 8, wherein the file contains audio information.

A-5 Sub 20. (Amended) The method according to claim 19, wherein the information related to the style of the template is one of a title, text, a pointer to a file containing image information, a pointer to a file containing graphical information, a pointer to a file containing audio information, and hypertext link information.

21. (Amended) The method according to claim 17, wherein the macro style template includes a style template that is one of a title template, a text template, an audio template, a picture template, a parallel column template and a navigational bar template.

A5 22. (Amended) The method according to claim 17, wherein the step of selecting the macrostyle template includes a step of selecting a graphical icon representing the macro style template.

A6 42. (Amended) The computer-readable medium according to claim 41, wherein the information related to the style of the template is one of a title, text, a pointer to a file containing image information, a pointer to a file containing graphical information, a pointer to a file containing audio information, and hypertext link information.

A7 45. (Amended) In a computer system having a graphical user interface including a display and a user interface selection device, a method for providing and selecting items for generating a hypertext markup language (HTML) page for transmission of the finished markup language page to a server, the method comprising steps of:

displaying a plurality of style templates on a display, each style template representing a layout style for a predetermined region of a web page layout;

receiving a style template selection signal indicative of a user interface selection device pointing at a selected style template on the display, the selected style template associated with at least one HTML code defining a style of the style template; and

displaying the style layout for the predetermined region of the web page layout in response to the received style template selection signal.
